The diagram shows the assembly of a hexamer. On the left, there are two monomers, labeled 'a' and 'b', each with three wavy lines extending from it. Next to them is a trimer, represented by a wavy line with the number '3' above it. An arrow points to the right, where a hexamer is shown. The hexamer is a ring of six subunits, alternating between 'a' and 'b' (three 'a's and three 'b's). Each subunit in the ring has wavy lines extending from it, representing the continuation of the polymer chain.
